Mechanical Engineering Index to Volume 114 (1992)

Feature Articles by Author

Antaki, Paul J.
"Designing and Delivering Technical Presentations," April, pages 63–65.

Ashley, Steven
"Applying Taguchi's Quality Engineering to Technology Development," July, pages 58–60.
"Around the World in a Dozen Days?" December, pages 46–49.
"DARPA Initiative in Concurrent Engineering," April, pages 54–57.
"Engineous Explores the Design Space," February, pages 49–52.
"GM's Ultralite is Racing Toward Greater Fuel Efficiency," May, pages 64–67.
"Handle with Care: Designing Damage-Proof Packaging for Products," October, pages 66–70.
"High-Flying Probe: Perseus to Sail into the Ozone," January, pages 62–66.
"High-Tech Yacht Breaks New Sailing Ground," August, pages 54–56.
"Lubricating Ceramic Engines with Exhaust," October, pages 72–73.
"Rapid Mold-Making for Investment Casting," November, pages 49–51.
"Reusable Rocket Shoots for the Stars," December, pages 40–43.
"Safety in the Sky: Designing Bomb-Resistant Baggage Containers," June, pages 81–86.
"Solar Photovoltaics: Out of the Lab and Onto the Production Line," January, pages 48–55.
"Turbines Catch Their Second Wind," November, pages 56–59.

Attig, Richard C., et al.
"Retrofit System for Firing Pulverized Coal in Boilers (Advanced Energy Systems)," September, pages 89–94.

Babanin, V.F., et al.
"High-Pressure Jetcutting," June, pages 88–91.

Baer, Tony
"Safety at a Glance: Upgrading the Displays in a Nuclear Plant Control Room," January, pages 56–60.

Bannister, Ronald L., et al.
"Developing a Direct Coal-Fired Combined Cycle," December, pages 64–70.

Barr, Vilma
"Alexandre Gustave Eiffel: A Towering Engineering Genius," February, pages 58–65.
"Applied Idea Management," February, pages 66–67.
"Building a Dinosaur for Fun and Profit," February, pages 70–72.
"Old Heads Oversee New Design," February, pages 68–69.

Burke, Peter Y.
"Evaluating Alternatives for Compressed Air," March, pages 78–79.

Constance, Joseph
"Can Durable Goods be Designed for Disposability? (Eco World '92)," June, pages 60–62.
"DFMA: Learning to Design for Manufacture and Assembly," May, pages 70–74.

Dixon, John R.
"Why We Need Doctoral Programs in Design," February, pages 75–79.

Enos, Anthony, et al.
"Cryogenic Spin Testing of NASA's Shuttle Engines," December, pages 44–45.

Epstein, Jonathan S., and George Laird II
"Fracture Mechanics and Finite Element Analysis," November, pages 69–73.

Fisher, Kenneth J.
"Counterbalance Mechanism Positions a Light with Surgical Precision (Designer's Case File)," May, pages 76–80.

Gallagher, Richard S., and Pamela J. Selker
"Three-Dimensional Volume Visualization in FE Analysis," May, pages 54–57.

Harmon, Robert
"Alternative Vehicle-Propulsion Systems," March, pages 58–65.

Harrington, Curtis L.
"In Filing Your Patent Application...Completeness Counts," March, page 80.
"Patent Protection May Extend to Software After All...," April, page 75.
"To Retain Rights, Patent Holders Must Act Swiftly," July, page 77.

Hirschenhofer, John J.
"Commercialization of Fuel Cell Technology (Advanced Energy Systems)," September, pages 82–86.

Honda, Hiroshi, et al.
"Working in Japan: An Insider's Guide for Engineers," January, pages 68–72

Jackson, Greg
"Shareware for Engineering," October, pages 80–81.

Kuehler, J.D.
"Setting an Example for the Class of 2000," February, pages 56–57.

Lienhard, John H., et al.
"Surfing the Sea of Stories: Riding the Information Revolution," October, pages 60–65.

Main, Bruce W., and Allen C. Ward
"What Do Design Engineers Really Know About Safety?" August, pages 44–51.

Marston, Charles H.
"Development of the Adjustable Proportion Fluid Mixture Cycle (Advanced Energy Systems)," September, pages 76–81.

O'Connor, Leo
"Active Magnetic Bearings Give Systems a Lift," July, pages 52–57.
"CGI Casting: A New Iron in the Fire," November, pages 42–45.
"Computational Fluid Dynamics: Giving a Boost to Engine Design," May, pages 44–50.
"Diagnosing Diesel Engines," March, pages 44–50.

"Toronto Skydome: The House that Engineers Built," October, pages 54–57.

Olsen, Christian M., and Robert H. Todd
"Designing and Building a Water Jetcutting Machine," July, pages 68–72.

Ott, Douglas A., and Jeffrey J. Rankin
"The Open Approach to FEA Integration in the Design Process," September, pages 70–75.

Paulsen, W. Charles
"The PC: The Next-Generation FEA Workstation," September, pages 63–67.

Puttré, Michael
"Advances in CAM Signal a Manufacturing Renaissance," December, pages 60–63.
"Computer-Aided Manufacturing: Sculpting Parts from Stored Patterns," April, pages 66–70.
"Document Management: Establishing an Electronic Archive," January, pages 74–78.
"Geographic Information Systems Add a New Dimension to Environmental Mapping (Eco World '92)," June, pages 54–59.
"Machine Vision Systems Struggle for Definition," July, pages 80–83.
"Plotting on the Straight and Narrow," March, pages 74–76.
"RISC Workstations Tackle Tough Engineering Tasks," November, pages 64–67.
"Software Makes Its Home in the Lab," October, pages 75–78.
"Technical Calculation Software Automates Problem Solving," May, pages 58–62.
"Updating Your CAD System," February, pages 53–55.
"Virtual Prototypes Move Alongside Their Physical Counterparts," August, pages 59–61.

Reis, John C.
"Coping with the Waste Stream from Drilling for Oil (Eco World '92)," June, pages 64–67.

Rogers, Dan
"Engineering a Device for Installing Dental Implants," April, pages 72–73.

Siuru, Bill
"European Diesels: Steady R&D is Paying Off," March, pages 52–57.
"Ford Trucks: The Evolution of Vehicles for Work and Play," April, pages 58–62.

Staff Report
"Oil Shear Brakes Boost Palletizer Hoist Drive (Designer's Case File)," July, pages 74–76.
"Stanford Program Bridges Gap Between Engineers and Managers," August, pages 52–53.

Studney, Michael J.
"When a Bridge Becomes a Catapult," December, pages 51–53.

Sykes, Charles
"From the Bumper to the Cab: Navistar Streamlines Its Design Process," May, pages 68–69.

Tallian, T.E.
"The Failure Atlas for Hertz Contact Machine Elements," March, pages 66–69.

Thomas, Stan W.
"Stereolithography Simplifies Tooling for Reinforced Rubber Parts," July, pages 62–66.

Turpin, Steve, and Henry Whitmore
"Designing Exercise Gear for Zero Gravity," March, pages 70–71.

Valenti, Michael
"Anemometers Serve as Watchdogs of the Wind," October, pages 50–52.
"Coal Gasification: An Alternative Energy Source is Coming of Age," January, pages 39–43.
"Emission Control: Retrofitting Process Plants for the 1990s (Eco World '92)," June, pages 68–74.
"Improving Safety in Process Plants," August, pages 38–43.
"Recovering Heavy Metals," December, pages 54–58.
"Resin Transfer Molding Speeds Composite Making," November, pages 46–48.
"Sensors Unite for Process Improvement," September, pages 54–58.
"Storing Hydroelectricity to Meet Peak-Hour Demand," April, pages 46–52.
"Tapping Landfills for Energy," January, pages 44–47.

Waldron, Kenneth J.
"Secret Confessions of a Designer," November, pages 60–62.
